

# CoverLetter

To whom it may concern,

My name is Jonathan de Araujo and I am a Graphic Designer /Web Developer with a Bachelor of Creative Industries (Communications Design) Degree from QUT. I have been working in the industry since about half way through my studies in freelance, part time and full time positions. I am interested in the role being offered at your business and feel that I am the perfect candidate for the position.

I'm looking for a position that will not only allow me the opportunity to express my creativity on a diverse range of projects but also one that is flexible and that will challenge me and give me room to grow. As an interested Designer/Developer I'm excited about getting my hands dirty learning something new and feel that I am a quick learner. I stay as up to date with the technologies present in my industry as possible.

I am proficient and experienced on both the Windows and Mac platform, and proficient with the Adobe Creative Suite and other industry related software listed in my resume. I have also worked extensively with content management systems such as WordPress and am highly confident in web development technologies. In my past roles I have taken projects from initial meetings with clients through to concepts and wire frames and finished products.

I would appreciate the opportunity to meet and further discuss my suitability, the role and to get to know you and your company in person.

Looking forward to hear from you.

Kind regards,

Jon de Araujo
