

Résumé Jonathan de Araujo

About Me

I was born in Johannesburg, South Africa and lived there until shortly after my 11th birthday when my family immigrated to Australia. I have lived in Brisbane since. I can come off as a bit shy until I get to know someone in which case I find it very easy to become friends, having said that I am also 100% confident in my ability to interact well with strangers and given my past work / academic experience I have no problem at all in dealing with customers or clients. I am well spoken and mannered, I take pride in my appearance and in the fact that I consider myself enjoyable to be around. I aspire to try doing new things and a goal of mine is to work as a graphic designer or artist. Career wise I would love to see where my design and development skills can take me. Ideally I would love to eventually own or manage a Graphic design or Games studio. I work well under pressure and am a valuable team member. Learning quickly and maintaining a high level of communication are valuable skills of mine.

Proficiencies

- Adobe Photoshop
